

REMARKS

By the present amendment, applicant is deleting the language asserted by the Examiner in the Advisory Action dated June 16, 2005 to be new matter in claim 1 and replacing that language with language from the specification.

The language now set forth at the end of claim 1 is taken from page 9 of the specification, namely, from the following sentences on page 9:

"The stretched tube or parison is later blow molded into the desired balloon shape.", and,

"Again, tubes are formed with the nanotubes oriented primarily along the axis of the balloon.", and,

"To enhance the resistance of the balloon tangentially, the original compounding may be followed by rolling and stretching the polymer to orient the nanotubes in one direction and then forming the tubes such that the nanotubes are originally oriented tangentially in the wall of the tube:"

Applicants submit that the language now set forth in claim 1 is supported by the above quotations from the specification.

An earnest endeavor has been made to place this application in condition for allowance, and an early and favorable action to that end is requested.

Respectfully submitted,

June 22, 2005
